

Included with the purchase of an RxSafe 1800.

The RxRWS (Remote Workstation) complements the RxSafe 1800™ and RxSafe 900™ by adding one or more workstations for checking in inventory, putting away remote stock, and filling prescriptions from remote stock. Additionally, all of the standard features of the RxSafe system, including reports, can be accessed from the RxRWS.

The RxRWS is designed to manage open stock inventory with or without the RxSafe tower system.

Included With an RxSafe 1800 System

Many pharmacies' workflow requires concurrent tasks like checking in inventory, filling prescriptions, and accessing reports for things to run smoothly and efficiently. Since the RxRWS now comes bundled with an RxSafe 1800, these activities can be accomplished simultaneously without disruption.

Accuracy & Speed

Space Savings

Narcotics Security

Inventory Management

- Fits into existing pharmacy workflow patterns and floor plans
- Automates daily put away process
- Increased inventory turns with less on hand inventory
- Virtually eliminates waste
- Remote Stock Management—includes all items in inventory not stored in the RxSafe system (i.e. refrigerator)
- Real-time accuracy to the pill or package (minimizes manual auditing)
- Real-time tracking of every operator interaction
- Expiration date and lot number tracking
- Biometric login required for medication access
- Utilizes Eyecon® automated pill counter (optional)

Specifications for RxRWS™ System
