## **Innovation and RxSafe, LLC Partner to Bring Together Pharmacy Automation Product Suites**

*Leading Pharmacy Automation Providers Believe Technology Synergy  
Delivers "Complete Solution" for Both In-store Pharmacies and Central Fill Sites*

**JOHNSON CITY, NY & SAN DIEGO, CA- August 17, 2011** - Innovation, makers of PharmASSIST® pharmacy automation solutions, and RxSafe, makers of the RxSafe® and RxVault™ systems, today announced that they have signed a partnership agreement that enables Innovation to distribute the RxSafe product line of automated, high density robotic storage and retrieval systems for pharmacies. The two companies will share a booth (#782) at the upcoming NACDS Pharmacy & Technology Conference in Boston, MA on August 27-30.

"The RxSafe product line perfectly complements our PharmASSIST product suite, and enables us to offer our customers the ability to automate up to 100% of their prescription volume," said Doyle Jensen, executive vice president of global business development, Innovation. "We can now truly scale to the customer's full range of prescription fulfillment needs and grow with them in all areas."

"Our partnership with Innovation takes full advantage of the considerable talent and technical strengths of both companies," said William Holmes, founder and CEO, RxSafe. "We are thrilled that Innovation, with its global sales and service outreach, will be distributing our RxSafe product line."

RxSafe's core technology automatically and securely stores, retrieves, and tracks pharmacy inventory down to the pill or package. The high-density storage systems handle pharmacy inventory in native packaging.

- The RxSafe 1800 System provides secure robotic storage and retrieval for 1800 native prescription containers. When scaled to a three-tower system, it provides storage and retrieval for the entire inventory of a retail pharmacy (up to 5400 native prescription containers) in less than 40 square feet of floor space. The system allows pharmacies to accurately fill and track prescriptions, manage inventory, eliminate theft and diversion, and avoid expired product. Using the customizable RxSafe System in multi-operator mode, pharmacies can fill up to 500 prescriptions per hour.
- The RxVault System, which is based on RxSafe's core technology, automatically, securely, and accurately tracks narcotics and other high-shrink inventory while providing a completely verifiable chain of custody and helping to ensure full regulatory compliance.

Innovation's PharmASSIST suite of pharmacy automation solutions is comprised of PharmASSIST OPTIx™ (optical counting and remote verification technology), PharmASSIST Symphony® workflow systems, PharmASSIST SmartScale® (counting scale) PharmASSIST SmartCabinet® (counting technology), PharmASSIST ROBOTx® (robotic dispensing), and PharmASSIST High Volume Solutions (for central fill and mail order/closed-door pharmacies).

**About RxSafe**

RxSafe's automated robotic storage and retrieval systems enable retail pharmacies to experience the convenience provided by the combination of prescription dispensing, real-time inventory tracking, and workflow optimization solutions. For more information on RxSafe, visit [www.rxsafe.com](http://www.rxsafe.com).

**About Innovation**

Innovation, a leader in the world of automated prescription dispensing and workflow systems, offers the PharmASSIST family of products to address the prescription growth, quality assurance, pharmacy workflow, and cost control challenges of all types of pharmacies. Using PharmASSIST pharmacy automation solutions, pharmacies increase operational efficiency, enhance patient safety, and set new benchmarks for quality, productivity, and customer satisfaction.
